The Intelligencer.

FRIDAY MORNING, AUGUST 4.

OUR PUBLIC SCHOOLS .- The city of Wheeling and parts of townships connected therewith, constitute the school district of Wheeling, for which a special school law was enacted at the last session of the Legislature, it having been ascertained that the provisions of the general school law of the State, were not adapted to the wants of a city population. The parts of townships not embraced in the corporate limits of the city, but attached to the city school district, are portions of Webster and Washington, the remaining portions being embraced within the city limits. This isting school system of the city. Some this evening at 5 o'clock. new provisions were adopted, which it was believed would operate to advantage, and promote the efficiency of the schools. On this point there was an honest difference of opinion among the members of the "Templars," (Sophofriends of the free school system, which mores, we presume,) we note the names can only be settled by the tests of time of two Wheeling Misses—viz.: and experience.

The most important of these changes, of school commissioners who should more invaluable service during the have control of all the schools within war. the district. This board to consist of three commissioners from each township, to be elected by the voters thereof; Second: The election by the board of a superintendent for the aration now before the public is Bock posed by law on county superintendents, or such other appropriate duties as may be devolved upon him by the Board.

Third To.

into three classes, viz.: Primary, Grammar, and High Schools. This provision looks to the establishment of a breathe a fragrant atmosphere, and Nasufficient number of primary schools ture, in all her bowers, has no richer to properly accommodate all the youth perfume than than this. Sold everywho need instruction in that department, and the division of the district into three sub-districts, and the location of a grammar school in each subdivision, and the establishment of one high school for the accommodation of great family institution! We are sendthe whole district.

the whole district.

It was this provision of the act which was most strongly objected to on the grounds that it involved too great an outlay in the way of buildings. The gan, & Co., and Logan, List & Co. wholesale and retail druggists, Wheeling. it required no more than it would under

school building in the city is inadewards or townships, the population to 9 P. M. 1 to 4 and 6 jy29-2w having outgrown the capacity of those which were erected several years since In some cases the old trustees have had new buildings in contemplation for two or three years, but were awaiting a reduction in the cost of building material. From the discussion in the terial. From the discussion in the Board we judge this question of buildings, in connection with the condition Stephen Davis and Wm. of the school fund, is the greatest diffi-culty they have to contend with. This of the school fund, is the greatest diffi-culty they have to contend with. This once settled, and they will have an open sea and plain sailing. The ques-tion of the superintendent has been In obschiere to a degree open sea and plain sailing. The question of the superintendent has been settled, and the policy of the Board in that particular is already determined by fixing a reasonably good salary and by fixing a reasonably good salary and wednesday, the 16th day of August, 1865. by fixing a reasonably good and by fixing a reasonably good and selecting a man with proper qualifications. We think, however, that the Board might have, without detriment to the interests of the schools, permitted this officer to have added to his income by availing himself of any other occupation that would not have interfered with his official duties.

Terms of Sake.—One half of the purchase money in Cash; the remainder in two equal instalments, payable in three and six months after dute, with interest from day of sale until paid; the purchaser giving bonds with good personal security, to be approved by microstal deferred instalments.

EDWARD M. NORTON.

his name for a benefit this evening, and if he receives a reward commensurate U. S. Commissioner's Notice. with his talents, the house will be crowded. The renowned play of Camille will be presented, in which Mr. Hamilton will appear as Armand Duval. Miss M. E. Gordon is the Camille. The Steamboat "Oil City." In Admiralty. Tomorrow Mr. Raymond announces his name and last night of the season.

To-morrow Mr. Raymond announces his name and last night of the season. Let the houses be crowded these two last nights.

Hempered.—It is expected the work of clearing the tunnel near Taloyrstown, on the Hempfield Railroad will be completed by Saturday, when trains will be run through as usual. The necessary suspension of the trains occasions great inconvenience to the citizens, who have learned to appreciate the advantages of the season.

The highest bid was \$\$,000.

POLICE COURT.—But two cases were
tried yesterday: John Semiler for abuslng Mrs. Shell was fined ten dollars and
long Mrs. Shell was fin fined ten dollars.

SANITARY .- Some of the citizens realding on the Island, complain that pro per sanitary measures are neglected by the city authorities, and that this neg lect is likely to result in a serious epi demic. From what we can learn, there is some foundations for these complaints Heaps of filth and garbage are left exposed to the action of the rain and sun, posed to the action of the rain and sun, which, under the circumstances must have a pernicious influence on the atmosphere, producing sickness, disease and death. Sanitary committees have been appointed to attend to matters pertaining to the health of the city, but we seldom, if ever, hear of them taking any action in regard to these matters so im portant to the public safety.

RIVER .- The river was on a stand yer terday with seven feet in the channel, special act so far as practicable, was The America arrived from below and made to conform to the general school departed for Pittsburgh. The Revenue, law of the State, and at the same time Capt. Russell, arrived from Cincinnati disturb as little as possible the then ex- and will leave again for the same port

WHEELING is famous for her manuing it north, south, east and west! It It was this provision of the act which makes light bread and light hearts

the old law. The provision, however, is permissive in its character, and leaves it with the Board of Commissioners to determine to what extent they will carry out the proposed system. Those who advocate the plan contend that when fairly inaugurated, the new system will be the most efficient, and can be carried on at a less cost than the old, but as we have already stated, time and experience must determine the question.

The Board of Commissioners have but recently organized, and have been laboring faithfully to get the system in operation. Like all newly organized bodies, they have many difficulties to overcome, requiring considerable time and patience. The question of building is one which meets them at the threshold. They find that nearly every sechool building in the city is inadequate to the wants of the different wards or townships, the population.

Chronic Disease. By the term, chronic diseases, is generally understod one that has alsted for some weeks, and is not attended, sensity, with febrile reaction on the time are not amenable to the common modes of medication. All chinoide desaese, when treated in season, can always be cured by proper means, but it re-during disease, spensevernnee is absolutely necessary, because it is rarely indeed that quick cures are made by the most skilled physicians and patients in the treatment of chronic affections, and more injury has been agreat stumbling block in the way of both physicians and patients in the treatment of chronic affections, and more injury has been agreat stumbling block in the way of both physicians and patients to make quick cures of this class of diseases, than by almost cures of this class of diseases, than by almost cures of this class of diseases, than by almost cures of this class of diseases, than by almost cures of this class of diseases, than by almost cures of this class of diseases, than by almost cures of this class of diseases, than by almost cures of this class of diseases, than by almost cures of this class of diseases, than by almost c
